

## 1-800-Recycling.com Reports from Copenhagen

February 11, 2010

1-800-Recycling.com, an interactive nationwide website dedicated to enhancing and democratizing the consumer recycling experience, currently features an article on its blog about the questionable lack of recycling bins in Copenhagen.

The article, titled "[Elusive Recycling in Copenhagen](#)," is actually 1-800-Recycling.com's newest writer Evan Kopelson's observations about the Danish city from his time there covering the COP15 Climate Conference. Copenhagen set a goal to become the first Carbon Neutral Capital City by 2015, but while there, Kopelson found recycling bins noticeable by their absence.

In the article, Kopelson goes on to share that a closer and deeper look revealed how Copenhagen is indeed a model city in terms of carbon footprint, and attitudes there toward recycling are different.

"We're excited to continue growing the global scope of our blog with terrific and committed writers such as Evan," said John S. Shegerian, Chairman and CEO of Electronic Recyclers International (ERI), the nation's leading recycler of electronics and e-waste, and parent company of 1-800-Recycling.com. "We are a one-stop on-line recycling resource, but going beyond that, we aim to report from the front lines of the green movement, much as Evan has done with this international story. We can all learn from what other countries are doing – right and wrong."

1-800-Recycling.com features a proprietary archive of original news articles about green practices for businesses or individuals, recycling, tips, educational information and interviews. Content is updated daily, and for those reading the articles who become inspired, 1-800-Recycling.com provides its visitors everywhere in the United States with a dedicated tool to find [recycling locations](#) nearest to them (every zip code in the country is covered) for whatever it is they wish to recycle.

Consumers can also opt to call 1-800-Recycling via telephone for a 24/7 phone line resource. Both the site and the phone service will be able to direct users to responsible recyclers of electronics, tires, oil, paint, glass, plastic, household hazardous waste, wood, mattresses, carpet, junk – basically everything that can be recycled.

For more information on recycling, please visit <http://1800recycling.com>.

*Now the largest recycler of electronic waste in the world, Fresno-headquartered Electronic Recyclers International is licensed to de-manufacture and recycle televisions, computer monitors, computers, and other types of electronic equipment. ERI processes more than 140 million pounds of electronic waste annually in its six locations in California, Washington, Colorado, Indianapolis, Massachusetts and Texas. For more information about e-waste recycling and ERI, call 1-800-884-8466 or visit <http://www.electronicrecyclers.com>.*
